## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 8-10, 25-26 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reinicke (5,404,908 or 5,450,871). The single coil is readable on element 10, the bar is readable on element 25 and the two operators are readable on elements 26-27. It is obvious that the two coil sections are readable on the coil sections on opposite sides of element 25. The sleeves are readable on element 60. Note that the limitation of claim 3 is a matter of design choice in view of the bar 25 and the sleeve 60. The limitation of claims 5 and 10 are a matter of obvious design expedient in view of the above discussed elements. Also, the divider is readable on the rod. Note the base is readable on elements 30 and a portion of element 60. The bobbin is readable on the element that encloses the coil 10.

### ***Allowable Subject Matter***

Claims 6-7, 11-16 and 34-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base

Art Unit: 3753

claim and any intervening claims.

Claims 17-24 are 27-32 allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
